

# CONSTRUCTION PARKING Update & Instructions

## Dear Valued Patient:

As the new medical office building construction is now underway, we realize parking may present some challenges. You will note that much of our parking lot has been fenced off. While patients may continue to park in front of the building, additional overflow parking is available on the west side of our building (noted in yellow on the map). **The overflow parking lot can only be accessed from Park Valley Dr.** The red line indicates the walking path to our building.

**Please allow additional time prior to your appointment for parking.**

We appreciate your patience!
